

MT Profil Oil Tank Gauge

Float Type

About the product

The MT Profil Float Type Oil Tank Gauge from [Afriso](#) is a small mechanical clock gauge for measuring the level of a tank's contents. Whilst popular for diesel storage tanks, it is most commonly used as a domestic heating oil tank gauge. This oil tank level gauge is available in different versions depending upon the specific height of the fuel tank, or there is an 8'0 adjustable version. The small display shows a scale of Empty 1/4, 1/2, 3/4 and Full for factory calibrated versions, allowing the user to quickly identify the approximate tank level. These [oil tank gauges](#) are supplied as standard with 1 1/2" BSP Male for easy fitting on the top of the storage tank or drum.

The 8'0 adjustable version of the MT Profil fuel tank contents gauge displays the level reading in cm, and has a reversible display which goes to 150cm max on one side, and 250cm max on the other.
