

Increase productivity

with SKF and Lincoln automatic lubrication systems

Continuous lubrication with customized progressive systems

In progressive automatic lubrication systems, a piston pump supplies a defined amount of lubricant through the main line to the metering device that serves each outlet. SKF ProFlex and Lincoln Quicklub systems are designed for specific applications and can be configured to meet the unique lubrication requirements of every lubrication point on the equipment.

Advantages:

- Continuous delivery of lubricant during pump running time
- Easy system monitoring
- Datalogger models track pump performance and notify operator if system requires service

Features:

- Reservoir capacity: 2–20 litres (4,4–44 lbs)
- Pressures: up to 350 bar (5 000 psi)
- Drive: 12 / 24 V DC
- Internal or external controllers
- Grease or oil
